SYNCADD

Strategically connecting data and decisions.

ENTERPRISE SOLUTIONS

Data driven insights. Innovative solutions. Vital outcomes. Our goals are to identify the right information and make it available at the right place and at the right time, optimize operations and enhance business readiness, boost strategic decision-making, and validate our commitment to value-added solutions. This is why the U.S. Army tasked us to develop the enterprise Pro-active Real Property Interactive Space Management System (ePRISMS), manage the Installation Status Report (ISR) system, and help the Office of the Assistant Chief of Staff for Installation Management (OACSIM) operate and maintain the Army Installation Atlas (AIA).

ePRISMS: The Army's Enterprise solution for space utilization management. It provides visibility to floor plans, maps, imagery, and readiness data consolidated from multiple Headquarters, Department of the Army (HQDA) systems (HQIIS, GFEBS, ISR, ASIP, and RPLANS), enabling sound strategic-investment decisions, space optimization, and cost savings.

ISR: The enterprise installation status assessment system, collects quantifiable metrics used to assist leaders in making informed decisions required to sustain and/or improve installation facilities, operational capacities, and support services. SYNCADD provides systems, software, and data management support, OACSIM and IMCOM support, and worldwide training. We captured data from 150 installations for over 100 services and 350,000 infrastructure assets, consolidated data from over 20 systems to provide an installation management readiness dashboard, and streamlined their business processes.

AIA: The Army Mapper (AM) replacement, is the authoritative record-keeping source for the Army's geospatial data. For AIA, we perform O&M support. For AM, we provided O&M support of the large enterprise system with over 100 servers and terabytes of data, developed advanced geospatial real property dashboards and analytics, integrated it with ISR and HQIIS, and aligned it to ASIP.

- **Business Systems Environment Operations & Maintenance (O&M)**
- **System Development, Deployment, & Support**
- **Database Synchronization**
- **Consolidation of Data From Multiple HQDA Systems (HQIIS, GFEBS, ISR, ASIP, & RPLANS)**
- **Preparation of National Security Systems (CNSS) Risk Management Framework and Security Plan**
- **System Management & On-Call Support**
- **Quality Assurance Plan, SOP, & Documentation Development**
- **Data Population & Legacy Data Migration**
- **Training & On-Site Support**
- **Communication & Outreach**
